Approved Study  
Plan

## Approach

This plan proposes an Interdisciplinary approach focused on English and Spanish teaching and learning sciences, incorporating sustainability across all disciplines.

We will critique pedagogy, calling into question some established practices against new, progressive approaches in education. The course will foster critical thinking for educators.

## Methodology

Case analysis, research, intra and interdisciplinary work will take place in virtual classes synchronously and asynchronously.

## Professional Practices

This training will allow students to:

- Experience teaching in primary education establishments with attention to intercultural and sustainability approaches.
- Develop and evaluate bilingual curricular models (Spanish- English) for primary education.
- Participate in the planning of bilingual educational projects.

## Professional Assets

Once the degree is completed, graduates will be able to:

- Integrate teaching, training and team collaboration.
- Coordinate sustainability programs.
- Coordinate Spanish and English integrated spaces.
- Integrate Spanish and English educational research teams.
- Produce engaging educational, bibliographic and multimedia material.

# Professionals
